

April 27, 2007

After much further study and review which included computer animations provided by the City of Tacoma, the New Tacoma Neighborhood Council voted on April 11, 2007 to reverse its position (attached letter dated February 15, 2005) regarding the proposed 180 foot height restriction for the Thea Foss Waterway. The council is now in favor of allowing the 180 foot height zoning change providing that view corridors are provided similar to what was shown in the computer animation.

Sincerely,
Marty Campbell, Chair
